## BRIEF BACKGROUND – IAN MOSS

- Born, raised and schooled on the land at Narrabri
- Followed my interest in agriculture via an Associate Diploma of Applied Science – Agronomy at University of Queensland which I completed in 1989.
- My first job was as a Cotton Agronomy Consultant with Geoff Brown Agricultural Consultants around Wee Waa – 1989-93.
- I started my own agricultural consultancy business (Moss Agricultural Services) around Wee Waa / Collarenebri / Walgett. 1993 - 99
- During that time I purchased a rural merchandise store at Collarenebri which I eventually sold to IAMA who asked me to stay on and manage their Walgett branch also. 1995-99
- After 10yrs of agronomic consulting and running the stores, I took a job with AgrEvo which became Aventis which became Bayer for 3 years managing the Cotton Logistics for the Field Sales Team and moved to a small farm near Pittsworth. 1999-2003
- The call to return to farming was too strong and I spent several years developing and managing a large-scale organic egg production business and a short stint producing meat chickens. 2003-07
- With my wife Sarah and business partner (Amanda Scibilia) we produce and sell organic meat into farmers markets in SE Qld via Alaringa Organics. Lamb, beef, pork & chicken are available – the lamb and some beef from our own property near Southbrook / Pittsworth and other meat / livestock is sourced from other local organic producers. Some weekends we are selling at 2 x Gold Coast markets, 2 x Brisbane markets and a Toowoomba (DDFM) market. 2005-present
- A small ad in the Qld Country Life caught my eye in 2007 – an opportunity to join BioNutrient Solutions (BNS) and return to agronomy but with a focus on innovative biological farming principles. Between the owners (David & Betsy Turner) vision and the owner/agronomist's (Bart Davidson) ability to carry it out, it was a perfect opportunity to fulfil their needs and to build the knowledge and experience needed for me to take the next step. 2007-09
- In 2009 I left BNS to return to agronomy consulting → Farm Agronomy & Resource Management Pty Ltd (FARM). With a focus on economic and environmental sustainability, FARM is involved primarily in the soil and crop nutritional aspects and supplies fertiliser to many clients also. 2009 - present
