SOUTH MYALL CATCHMENT LANDCARE GROUP INC

South Myall Landcare received funding in July 2017 from the Queensland Government to deliver a project under their community Sustainability Action Grant for the removal of African Boxthorn on 45 hectares of land at Rosalie Plains, and spraying of lantana in the Highgrove area on two properties.

In addition to this Dan Abel will be planting trees for Koala habitat and completing 2km of fencing of remnant vegetation.

The African Boxthorn will be removed using a modified excavator, and hence no chemicals will be sprayed in the air.
