

Drought - make every drop of water count

Join **Condamine Catchment Management Association** for a **workshop regarding the cycle of drought**. A **Soil Scientist** will engage with landholders to discuss options for best managing the diversion of water to enhance pasture, water profile and reduce erosion into creeks. **Pasture Expert** to advise on how to manage in drought conditions and preparedness for rain. **Personnel from the Climate Department USQ**, will provide information on El Nino and La Nina, the SOI (Southern Oscillation Index), and how they are associated with rainfall in the local district. Opportunity to have access to Low Intensity mental health experience with **Tie Up the Black Dog & Rural Aid presenters**.

Our List of Experts: *Pasture:* Brian Johnson (retired DPI technical Officer); *Soil Scientist:* Mark Genrich & Rob Loch; *Climate:* Climate Mate, Paul Webb Project Manager, David Cobon, Extension Specialist, Damien O'Sullivan & Chelsea Jarvis. *Mental Health:* Mary Woods & Jenny Jensen.

The funds for this grant were received through the Drought Relief Appeal undertaken by Landcare Australia and made possible thanks to the wonderful contributions from the supporters and the wider community. Condamine Catchment Management Association would like to thank Landcare Australia supporters and the wider community for the resources to complete this project.
